

TABLE OF CONTENTS

Personnel	v
Publications and Reports	viii
I. Physical Electronics	1
Electron Emission Problems	1
Study of an Ideal Retarding Potential	1
Physical Electronics in the Solid State	2
Hall Effect in Lead-Sulfide Films	2
Surface States on Semiconductors	3
Gaseous Discharges	4
Harmonic Analysis of Distribution Functions	4
Experimental Techniques	6
High-Vacuum Studies	6
The Spectral Emissivity of Tungsten	9
II. Microwave Gaseous Discharges	10
Plasma Oscillations	10
High-Density Microwave Plasma	11
Pulse Breakdown in Gases	12
III. Low Temperature Physics	16
Attenuation of Sound in Liquid Helium	16
IV. Microwave Spectroscopy	20
Paramagnetic Resonance	20
Microwave Emission Spectroscopy	22
Spin Echoes	23
V. Nuclear Magnetic Resonance and Hyperfine Structure	24
Hyperfine Structure of the 3P_1 State of Mercury by Double-Resonance Methods	24
VI. Microwave Electronics	25
Klystrons	25
Multiple-Cavity Klystron Theory	25
Experimental Multiple Klystron	27
Klystron Efficiency	27
Noise Theory (Sec. XII-A)	87
VII. Atomic Beams	31
Measurement of the Velocity of Light	31
Theory of Atomic Hyperfine Structure	32
Hyperfine Structure and Nuclear Magnetic Octopole Moments of the Stable Chlorine Isotopes	35
Stabilization of Klystrons by Phase Locking to Low-Frequency Quartz Crystal Oscillators	37
VIII. Multipath Transmission	42
Feedback Around the Limiter	42
The Concept of the Equivalent Interference Ratio	49

CONTENTS

IX.	Statistical Communication Theory	51
	Improving the Performance of a Given Filter	51
	On the Problem of Multiple Linear Prediction	55
	Stationary State Distribution of Discrete Markov Systems	60
	Basic Theory of Flow Graphs – Inversion	64
	Digital Probability Density Analyzer	69
	Analog Probability Density Analyzer	70
X.	Processing and Transmission of Information	72
	Multiple-Ground Coding in Iterative Switching Circuits	72
	Hazards in Sequential Switching Circuits	76
	Symmetric Switching Function Identification by Means of Decimal Procedures	78
XI.	Transistor Circuits	85
	Transistor Circuitry	85
XII.	Noise in Electron Devices	87
	An Improved Measure of Noise Performance	87
	Diode Mixer Performance as a Function of Temperature	88
XIII.	Irreversible Thermodynamics	90
	On the Distribution of Fluctuation Paths	90
	Space-Time Correlations in Irreversible Thermodynamics	91
XIV.	Mechanical Translation	93
	The Range of Adequacy of Various Types of Grammars	93
XV.	Communications Biophysics	97
	Bifrequency Analysis of Repetitive Auditory Stimuli	97
	Responses to Clicks Recorded from the Anterior Suprasylvian Gyrus	101
	Correlation Studies of Effects of Visual Stimulation upon Anesthetized Cats	105
	Correlation Analysis of Brain Potentials under Conditions of Auditory Stimulation	109
XVI.	Neurophysiology	110
	An Electronic Electrometer	110
	Properties of Intramedullar Fibers	112
XVII.	Nonlinear Circuits	115
	Piecewise-Linear Network Analysis	115
XVIII.	Network Synthesis	120
	Time-Domain Synthesis by Fourier Methods	120
	A Saddlepoint Theorem	120
XIX.	Microwave Theory	123
	Impedance Transformations by the Isometric Circle Method	123
	Impedance Transformations in the Three-Dimensional Hyperbolic Space	126
